# A GREEN FUTURE IN A CLEAN WORLD

We plan and produce products that ease lives with a focus on environment and human.

We realize our lawful and respectful approach in all our products due to our philosophy merged with ethics and with the thought of leaving a better world for our children.

We cannot help but act more responsibly when we think about our generations that we will entrust our future to.

In this age we live in, we internalize the environmental awareness as a company policy and manage all the production processes accordingly.

We are aware of how valuable your time is; that is why we always improve ourselves for you to do much more work in less time. No need to doubt that we will always strive for innovations and will present brand new products with our R&D projects.

We grew by day as we gained your trust and strength by our side.

We express our gratitude to all our clients that have faith in us and have a role in our success.

## SOYTEKS Solvent Based Textile Washing

This product created for textile washing industry, dry cleaners and laundries is a one-of-a-kind liquid cleaner that has multi-directional opaque viscosity. It has high cleaning power and is effective against stains and dirt with wetting and distributive properties. It has a preservative effect in softening, preserving shine and preventing colors from fading thanks to its special formula. It is effective on dissolving and distributing heavy dirt, grease and stains with surface-active agents and solvent compound. It prevents residue. It prevents dirt from sticking to fibers by detaching them from application area and binds the dirt to its system. It is low-foaming. It can be used without doubt for all products containing "can be washed with water" inscription.

**Usage:** Add it to the appropriate part of the machines. It is recommended to use between 3-5 ml for every 1 liter of water.

**Packaging Type:** It is offered in 25 and 30 liter packages.

## WHITE Liquid Detergent for White Clothes

It is used as detergent in automatic washing machines. It enables your white clothes in every washing to stay as white as new thanks to its optical decolorant components. It is the main liquid detergent that does not include decolorants foaming less. It is used with special dosing pump in automatic and tunnel-type machines. It is suitable for cotton, synthetic and fibre mixture white fabrics. It is effective in every water hardness and temperature.

**Usage:** Add it to the appropriate part of the machines. It is recommended to use between 3-5 ml for every 1 liter of water.

**Packaging Type:** It is offered in 20 and 25 liter packages.

## COLOR Liquid Detergent for Colors

It is used as detergent for in automatic washing machines. It makes colors look lively again thanks to its unique anti-color transferring formula. It is the low-foaming main liquid washing detergent that does not include decolorants. Its dosage is adjusted with special dosing pump in automatic and tunnel-type machines. It is effective in every water hardness and temperature.

**Note:** Please abide by the guidelines of clothes for washing.

**Usage:** Add it to the appropriate part of the machines. It is recommended to use between 3-5 ml for every 1 liter of water.

**Packaging Type:** It is offered in 20 and 25 liter packages.

## OXI LIQUID

### Oxygen Based Decolorant

It contains oxygen based decolorant. It is an auxiliary washing product. It is suitable for use in all kinds of industrial washing machines. As it is liquid, it mixes with washing water quickly. It can be used in the process of removing stains in fixed-colored clothes. It shows the best results when washed around 50-60°C temperature for bleaching procedure.

**Usage:** Add it to the appropriate part of the machines. It is recommended to use between 2-4 ml for every 1 liter of water.

**Packaging Type:** It is offered in 20 and 25 liter packages.

## OXI / Oxygen Based Decolorant

It is a safe, bleaching and stain removing product with active oxygen it contains. It is used in full and semi-automatic washing machines. It creates the optimum effect above 50°C. The recommended amount is increased in lower degrees. It is suitable for use in white and colored, cotton, synthetic and cotton and synthetic mixture textile. It must be used below 60°C in colors. Color stabilization of the textile must be checked before using the product.

**Usage:** 1-3 gr is used in 1 liter of water according to its state of dirtiness. 5-15 gr is used in 1 liter of dry clothes.

**Packaging Type:** It is offered in 5,10 and 20 kg packages.

## CLOR

### Chlorine Based Decolorant

It is effective on stain removing and bleaching of white clothes thanks to its chlorine based formula. It removes bad odour of clothes. It does not damage texture of clothes when used appropriately according to guidelines. It can be used with main washing detergent. It can be safely used in laundries.

**Usage:** Add it to the appropriate part of the machine. It is washed and rinsed for 10-20 minutes with 5 ml CLOR below 40°C in white clothes. Washing continues with a detergent after that.

**Packaging Type:** It is offered in 20 and 25 liter packages.

**WET CLEAN**

## POWER

### Main Liquid Detergent

It is a wet, low-foaming, very powerful, washing detergent without decolorants that is specially developed for general use purposes for automatic washing machines. It is safely used in white and colored clothes. It is appropriate to use it with chlorine or oxygen based decolorants in white clothes.

**Usage:** Add it to the appropriate part of the machines. It is recommended to use between 3-5 ml for every 1 liter of water.

**Packaging Type:** It is offered in 20 and 25 liter packages.

## CLASS

### Dry Cleaning, Fore-cleaning for Dirt Removing

It is a very effective cleaning product that is used with the help of a hand, spray or brush in the process of dry cleaning and water wash. It is a stain remover that removes bad odour, sweat smell, dirt on collar, cuffs, liner, mud and mud-like stains. The duration and amount of use change depending on the type and density of the stain. In laundries, waiting period is 2 to 4 minutes according to weight rate after the product is sprayed to the area with intensive stain. Washing process continues by scrubbing with the help of a brush if needed.

**Usage:** It is used directly. Solvent or any other additive should not be added. Put clothes into the washing machines directly after using the product. Try the product on an invisible area of fabric before using it. Try it with caution on pure silk, pure flax and some other linings.

**Packaging Type:** It is offered in 10 and 20 liter packages.

## SOFTENER

### Extra Softness Perfume Effect

It is a product for softening clothes. It is suitable for use in automatic and industrial washing machines. It has the optimum efficiency with strong softening power. It protects fiber structure and lengthens clothes' lifespan by preventing them from wearing out. It eases ironing and decreases electrostatic behaviour. Its special perfume penetrates well into clothes and enables them to smell nice for a long time. The active agents it contains can decompose in nature.

**Usage:** 100-150 ml of product is added to last washwater in automatic, normal machines and handwashing.

**Packaging Type:** It is offered in 20 and 25 liter packages.

## DRY CLEANING

# Solvent based Dirt Removing Fore-cleaner

It is a prewashing product with stain removing additives. It is a powerful stain remover that can be applied with a brush before cleaning in dry cleaning. It has antistatic property for all solvents. In clothes, it is used to soften the areas with intensive dirt such as collars, cuffs and pocket flaps. It is especially used for removing grease, mud, sweat, and heavy dirt based stains. It is used as pre-decontamination chemical for heavy stains such as grease, tar, pitch and oil paint. The dosage and length of application time can change according to the density and type of the stain.

**Usage:** This product can be used directly or by with solvent. Water or any other additive should not be added. Put clothes into the washing machines directly after using the product. Try the product on an invisible area of fabric before using it. Try it with caution on pure silk, pure flax and some other linings.

**Packaging Type:** It is offered in 10, 20 and 25 liter packages.

## DRY CLEANING

# Water based Dirt Removing Fore-cleaner

It is a very effective cleaner used with the help of hand, spray, brush n the process of waterwashing and dry cleaning. It is a stain remover that removes bad odour, sweat smell, dirt on collar, cuffs, liner, mud and mud-like stains. The duration and amount of use change depending on the type and density of the stain. In laundries, waiting period is 2 to 4 minutes according to weight rate after the product is sprayed to the area with intensive stain. Washing process continues by scrubbing with the help of a brush if needed.

**Usage:** This product can be used by itself or by diluting at 1/3 rate. Solvent or any other additive is not added. Put clothes into the washing machines directly after using the product. Try the product on an invisible area of fabric before using it. Try it with caution on pure silk, pure flax and some other linings.

**Packaging Type:** It is offered in 10, 20 and 25 liter packages.

## CREAM

# Scrubbing Detergent

It is used as scrubbing chemical by hand in laundries and dry cleaners. It is rubbed to the area with the help of a brush. It is applied locally to dirty areas.

# MAGIC FORMULAS THAT MAKE YOUR CUSTOMERS HAPPY

## RIVAX-1 Rust Remover

It is used to remove rust stains caused by metal, iron and copper.

**Usage:** Try it on invisible areas of sensitive and colored clothes. It is dripped on the stained area of clothes and fabric. It waits for 10-15 minutes and then scrubbed with gloves and rinsed with plenty of water.

**Packaging Type:** It is offered in 1000 ml and 5 liter packages.

## RIVAX-2 Ink and Paint Remover

It is a ball-point pen stain, ink and paint remover. It is used for oil-paint, nail polish, lipstick, tar, ink, grease, mineral oil and quasi stains.

**Usage:** It is used in fabrics that is dry cleaned. Product is dripped to the stained area, waits for 5-10 minutes and it is removed with the help of a brush. It is more effective with steam on stain removal table. Do not use it on leather, napa, suede and quasi clothes. Repeat the process for intensive stains by lengthening the waiting process. Use it after trying it on an invisible part of the fabric.

**Packaging Type:** It is offered in 1000 ml and 5 liter packages.

## RIVAX-3

### Grease Remover

It is effective on removing oil, oil-paint, pitch tar, paraffin, natural and artificial oils, grease, metal frictioned oil, food grease and greasy stains whose origin is unknown.

**Usage:** It can be used in fabrics that is dry cleaned. It is more effective with steam on stain removal table. Repeat the process for intensive stains by lengthening the waiting process. Use it after trying it on an invisible part of the fabric.

**Packaging Type:** It is offered in 1000 ml and 5 liter packages.

## RIVAX-4

### Tannin Remover

It is the processing product for tea and coffee, wine, coke, juice, tobacco, grass, perfume, ketchup, mayonnaise, beer, medicine and quasi stains. We recommend starting the stain removing process with trying it on an invisible area of the fabric first.

**Usage:** Product is dripped to the stained area, waits for 5-10 minutes and it is scrubbed with the help of a brush. Continue with the washing process after directly applying the product to the stained area.

**Packaging Type:** It is offered in 1000 ml and 5 liter packages.

## RIVAX-5

### Blood and Protein Remover

It is a stain remover for blood, protein, food residue, fish and meat sauce, milk, ice-cream, beer, chocolate, cacao, sweat stain, urine and quasi elements that cause stains. We recommend trying it on an invisible area of the fabric first before starting the stain removing process.

**Usage:** Continue the washing process after directly applying the product to the stained area.

**Packaging Type:** It is offered in 1000 ml and 5 liter packages.

 **AUTOVIZYON**<sup>®</sup>  
AUTO CARE PRODUCTS

# AUTOWASH

## Foamy Polishing Car Washing Detergent

Auto Vizyon Foam ensures an excellent cleaning without using brush and sponge. It is a concentrated product. It cleans quickly and practically. It is used for cleaning the exterior of all kinds of vehicles such as automobiles, trucks, rigs and heavy construction vehicles and as a grease remover. It can be easily used in car services, gas stations and cleaning sites. Active elements of AUTO VIZYON are biodegradable above 80% of rate.

**Usage:** 1 liter of product is used in 60-liter-machines and 1.5 liter of product is used in 90-liter-machines. Use municipal water. Wait for 1-2 minutes depending on the density of dirt after using the product on cars. It may cause changes on shades in matt and worn-out paint when it stays on car too long. Do not apply it under direct sunlight and windy areas. Start washing process from the first application point of product. If used as foam, ensure the foam is fluid. Make sure the product reaches to all parts of the car.

**Packaging Type:** It is offered in 10 and 25 liter packages.

## Tire & Bumper Polisher

It is used for protecting and polishing tire and plastic surfaces thanks to the special emission it contains. When used regularly, it protects the color of tire and plastic surfaces and makes them stay the same just like the first day. It does not contain any chemicals.

**Usage:** It is sprayed on to the clean surface. The recommendation is to spread it with a sponge. It keeps its effect for 7 days under normal conditions. It postpones pollution by giving an original look to car tires and does not keep dust. It is more effective on dry surface.

**Packaging Type:** It is offered in 10 and 25 liter packages.

## Rim Cleaner and Polisher

It is effective on cleaning of rim, metal and chrome surfaces and stiffened lining dust, grease and quasi dirt. It polishes and cleans heavy dirt and grease between rims and chrome surfaces. A brush may be needed for very serious rusty dirt.

**Usage:** Before washing, the product is sprayed on rim and lining and then washing process continues. It is used purely or increasing the amount with the rate of 1/10 according to the density of dirt and grease. It is recommended to not wait too long on sensitive surfaces.

**Packaging Type:** It is offered in 10 and 25 liter packages.

## Quick Polish Water-repellent

When used regularly, it keeps the car surface shiny and vibrant. It prevents detergent residue occurring after wash, water and lime stains from forming and keeps waterdrops away from hanging on windows thanks to its water shifting feature. It retain its effect for 15 days under normal condition.

**Usage:** The product is sprayed on to the wet surface after washing the car. It is rinsed after spreading it with a shag or sponge. It is used purely or by increasing the amount with the rate of 1/4. Wipe ithe surface with a cloth instead of a rickshaw after washing the car for increasing the effect of the product.

**Packaging Type:** It is offered in 10 and 25 liter packages.

## Washing Detergent for Trucks and Construction Vehicles

This product composed of the mixture of high quality raw materials is used for cleaning the exterior surface of all kinds of lorry, truck, bus, concrete mixer and construction vehicles. It gets rid of persistent and hard-to-clean grease, dirt and mud residue.

**Usage:** It is applied with spraying method by diluting it around 2.5-3.5% in proportion according to the rate of dirt on application surface. This product should directly contact the application area in order to remove dirt and grease better. It is recommended to wait for 5-8 mins especially on stiffened muddy and greasy surfaces. It produces better results if it is applied serial and horizontal with high pressure water. The mud remaining inside of shroud and soffit of lorries and trucks that are dirtier can be cleaned easily with high pressure water if it directly contacts with stiffened layer and road residue.

**Packaging Type:** It is offered in 10 and 25 liter packages.

## Concrete Remover

It cleans all cement waste easily on applied surfaces with the powerful formula of the product. It has been developed for use in industrial areas, concrete production facilities carwashers and construction industries like concrete carriers. This is a product with concentrated cement and concrete removing acidic character. It is a concrete and cement remover with enhanced conservation that has been strenghtened with chemical, metal and paint inhibitors.

**Usage:** It is used on the hardest surfaces as concrete grout dissolver and remover. It is also an effective concrete mixer cleaner. It is sprayed at the rate of 1/7 or 1/15 depending on the weight of concrete or grout. It is rinsed with pressured water by scrubbing with a brush. It must not be multiplied with any other element by no means.

**Packaging Type:** It is offered in 10 and 25 liter packages.

## Elaborative and Multi-purpose General Cleaning Product

It has been developed for the cleaning of leather, plastic, carpet, ceiling and internal parts of cars. It removes and cleans heavy dirt and grease easily thanks to its powerful agent with thorough effect.

**Usage:** It is a concentrated product that can be multiplied at the rate of 1/10 depending on the severity of stains. It prevents stain occurrence later if the surface of application is drained and dried carefully. Not using the product heavily concentrated on plastic, metal and some leather surfaces and not keeping it on surface for too long is particularly recommended. You must proceed to vacuuming and brushing process without waiting after applying the product for stain to not reappear on sponge seats later.

**Packaging Type:** It is offered in 10 and 25 liter packages.

## Glove Box Protection

It is used in all vinyl, leather and plastic surfaces in cars and gives shine to the application area. It is more effective when distributed with a sponge. The application surface must be dry and clean. If the area that the product is used is wiped with a microfiber cloth after the process, a matt look can be achieved on the area.

**Usage:** It is distributed with a sponge after the product is sprayed enough on the clean area. It does not leave any stain when the product is spread to the area well and does not cause greasiness and dust. The product may cause a smudgy appearance after drying when used on dirty surfaces. Especially in hot weather, wiping with a dry cloth after using the product on window edges is recommended. Otherwise, it may cause a dirty clouding on windows.

**Packaging Type:** It is offered in 10 and 25 liter packages.

## Engine Cleaner Heavy Dirt and Grease Remover

It especially has property of cleaning engine greased parts and surfaces. It must fully contact the area to be cleaned. It removes and cleans dirt and grease with its powerful agent and is an alkaline product. It can be applied manually or with a blow gun. When sprayed with too much pressure, it may cause a chemical scent.

**Usage:** It is sprayed to the surface of application and rinsed with pressurized water. It must stay on area for 5-10 mins after it is sprayed. Using gloves is recommended in order to use the product with hand. Do not apply to hot engine. It can be diluted at the rate of 1/4 or used purely depending on the density of dirt and grease.

**Packaging Type:** It is offered in 10 and 25 liter packages.

## Car and Room Fragrance

It reduces the bad odour to minimum in automobiles and indoor areas. It has a lasting feature. It leaves a long-lasting scent particularly when sprayed to car floor carpets and under the seats of cars. It shows effect even in low dosages.

**Usage:** It is sprayed with a spray gun. It is recommended to spray the product in a way to distribute it in calibrated pumps and do this as the last process after car cleaning finishes. Spray it to surface lightly, do not dilute it. Reduce the air flow to minimum in the application area to increase durability.

**Packaging Type:** It is offered in 10 and 25 liter packages.

## Pitch and Tar Remover

This product, mainly made up of solvent, has the property of removing pitch, tar, pest, grease and some kinds of paint on car hood, rim and plastic surfaces. It does not damage application area. It especially gives a visible shine to hood if it is used with a microfiber cloth after the process on car hoods and metal surfaces ends. It leaves plastic and vinyl surfaces matt. Avoid contact with fire.

**Usage:** It is sprayed on the surface wished to apply and wiped with a sponge after 1-2 minutes of waiting. It is cleaned with dry microfiber cloth and rinsed with pressured water.

**Packaging Type:** It is offered in 10 and 25 liter packages.

## Surface Cleaner Heavy Dirt and Oil Remover

It is a concentrated product and used by diluting it around 1/3 or 1/10 rate depending on the density of dirt and grease. It has two types separated into foaming for manual cleaning and non-foaming for automatic floor machines. It can be sprayed to the application surface manually or poured to container of the machines. It has a quick removal property for densely dirty and greasy areas such as gas stations and auto services.

**Packaging Type:** It is offered in 10 and 25 liter packages.
